

TRAINING  
DESCRIPTION

## Tactical Pistol stage one

---

Join our 2 days training program for defensive pistol shooting.

We teach an Israeli method for combat defensive shooting. Training with a pistol is our objective in this training.

What does it mean defensive: we teach you to efficiently react with a pistol to a violent life threatening attack, against, you, your loved ones or the community.

What do we mean by efficient: The shortest way between two points is a straight line- If the life you care about is under existential threat you will have to react fast and accurate, If you do not act fast enough you will be too late, if you are not accurate you will cause additional unnecessary damage which you will be responsible for. Efficient also mean using the fast and accurate weapons malfunctions manipulations, fast and accurate magazine changes, to know where to place yourself during a fight and to do it fast.

Who is the training for:

- This training is beginners friendly. At the end of the second day you will not be a beginner anymore, but a confident shooter.
- We will happily push experienced shooters forward and sharpen your combat skills further.
- Law officers will receive a discount on the published price

This training does not offer gun licence option, however no gun licence is required to attend the training.
